

QUANTITATIVE RESEARCHER

Red Cedar Research LLC, a Canadian subsidiary of a US quantitative management investment group, is looking for a full-time Quantitative Researcher, located in Canada, to join its growing international team

Requirements

- Bachelor, Master, or PhD in Mathematics, Physics, or Computer Science
- Exceptionally strong record of achievement in the field of specialty: high GPA (90% or higher), academic papers, grants, rewards, conference presentations
- Work experience at a hedge fund is highly desirable and will be considered an advantage
- Strong knowledge of probability, statistics, optimization, numerical methods
- Very good programming skills in Python
- Interest or experience in quantitative finance
- Fluency in English is required
- Ability to commit to 55+ hours/week in an office in Montreal, Toronto, or remotely
- Legal residence in Canada is required

Responsibilities

- Working with large and complex datasets to build quantitative models which predict future price movements
- Applying modern mathematical and statistical methods
- Analyzing academic literature

Opportunities & Benefits

- Learning practical modern quantitative finance from experienced researchers and portfolio managers
- Working with complex and large datasets
- Using modern quantitative finance technology
- Compensation system and benefits are negotiable
- 90,000 CAD/year if located remotely; 125,000 CAD/year if working from the office
